REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of claims 6,8,9,11-14 & 20 is the inclusion of the limitations of an image recording apparatus that includes a record unit expressing gradation for the images to be recorded using a first pulse having a larger pulse width expressing a superordination bit and a second pulse having a smaller pulse width expressing a subordination bit; and a controller that generates a plurality of timing signal that are transmitted to respective frequency divider to generate the plurality of pulses, wherein at least one of the frequency dividers outputs a second frequency divided signal to a processing circuit that generates at least one output in accordance with stored data. It is these limitations found in the claims, at they are claimed in the combination of, which has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 2, 3,15-17,19, 21 & 22 is the inclusion of the method steps of expressing gradation using a first pulse expressing a superordination bit having a larger pulse width and a second pulse expressing a subordination bit having a smaller pulse width; recording a single pixel forming an image that includes generating a plurality of timing signals that are transmitted to respective frequency dividers to generate said plurality of pulses; at least one of the frequency dividers outputting a first frequency divided signal to a switching device, and at least another of the frequency divider outputs a second frequency divided signal to a processing circuit and the processing circuit generating at least one output in

accordance with stored data. It is these step found in the claims, at they are claimed in the combination of, which has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 10 & 18 is the inclusion of the limitations of an image recording apparatus that includes a pattern of generating the plurality of pulses is set to be random between the pixel positions in a horizontal direction to prevent cyclic irregularity. It is this limitation found in the claims, at they are claimed in the combination of, which has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kokubo (U.S. 5,587,732) discloses a thermosensitive color recording paper with a thermal head that are driven by a pulse train constituted of a bias pulse and gradation pulses.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
